

Notes from Initial Build

- WOW ERIC it's looking exquisite!
- I think you really hit everything I made comments about last time with contrast, margins, paragraph width, awesome
- I really don't have that many edits for you on this round, if anything I think that you could change the subtitle to a different color to have it stand out more
- I think the change in color on the hover states is really smart
- And the drop shadow nav, chef's kiss
- But yes, if you could just make those changes, I would appreciate it, thanks!
