

## Notes from Mockup Review

- Great first start with the mockups, I'm a huge fan of mockup A
- The way that it looks like an aquarium at the bottom is really cool
- I think that the text size doesn't have to be that big, you could definitely move it to an h3
- Also just be careful about paragraph width, could go smaller
- Margins as well, it's cutting it a little close
- Contrast on the background and text is too low, either go with a darker color text or remove the background photo, or both?
- Maybe text wrap?
- Seriously though, great start, I would just go with A and make edits from there!
